# ENCOUNTER BIKEWAY

The City of Victor Harbor is seeking feedback on proposed options for realignment of the Encounter Bikeway from Hindmarsh Road to the Council boundary.

Council has developed three options for improving the Encounter Bikeway, including options to connect into Alexandrina Council. These options explore using the coast-front road reserves, using the rail corridor, or retaining the existing on-road alignment.

## OPTION 1 - Follow coast-front roads and reserves

Option 1 stays high on top of the rail corridor cutting, utilising a combination of the coast-front road network (Olivers Parade, Hayward Street and Hayward Court) and coast-front reserves between Investigator carpark and Hindmarsh Road.

## OPTION 2 - Follow the rail corridor

Option 2 utilises the rail corridor from Investigator carpark to Hayward Street before climbing the cutting at the Hayward Street beach access steps and then descending back to the rail corridor at the Hayward Court beach access stairs. This option crosses the rail line and arrives at the Hindmarsh Road pedestrian chicane via the coastal dunes and Hindmarsh River Lagoon.

## OPTION 3 - Retain existing on-road alignment

Option 3 utilises the secondary road network for the entirety of the project area from Hindmarsh Road to Seagull Avenue.

The outcome could be a combination of options as there are many points the alignments cross-over each other: A - D
